Allium

Cyrus Highsmith's Allium series is a humanist sans serif with a pan-European character set. It's a calm, maybe even quiet design, drawn for headlines and deck sizes. Highsmith named it after a genus of flowering plants that includes onions, leeks, and garlic.

The truth is, if you're using a good typesetting application and you just leave the settings on default, you can set type that's more or less adequate. However, good typographers are experts who have something to add to the reading experience. They finely tune the typography for specific documents to make it more than just adequate. In their choice of typefaces and decisions about things like point size and spacing, typographers clarify the voice of the author and make the reading experience more enjoyable. This isn't meant to discourage beginners from attempting typography. But it is important to acknowledge that the art of typography is often subtle, and without training it can be difficult to see what's going on. The goal of this book is to help students train their eyes to see text as typographers do.
